EDUCATION

B. S. ,University of Science and Technology of China

Sep 2023 - Present

School of Chemistry and Materials Science

- **Major:** Physical Chemistry
- **Minor:** AI
- **GPA:** 3.84/4.30|Overall Ranking **6/100**,Major Ranking **3/23**

Core Courses

- Analytical Chemistry I(98), Physical Chemistry I(EN) (96), Organic Chemistry(A1) (EN) (87),Experiment of Organic Chemistry I(EN)(A),Numerical Analysis(93),Mathematical Analysis B1(90),Mathematical Analysis B2(92),Linear Algebra B1(93)

RESEARCH EXPERIENCE

Molecular Dynamics Under Photoexcitation

July 2025 - Aug 2025

University of Westlake | Advisor: Prof. Gu Bing

Hang Zhou, China

- Conducted introductory quantum chemistry and theoretical calculation training, translating theory into executable computational workflows.
- Built basic molecular models and performed preliminary computations in Python; analyzed molecular kinetics and potential energy/energy-profile curves for simple systems.
- Developed physical intuition for photophysical processes by interpreting computed results and summarizing findings through literature reading and internal reporting.

Fluorescent Protein Design based on Integrated Machine Learning and Multiscale Simulation

Approaches

July 2025 – Present

University of Science and Technology of China | Advisor: Prof. Jie Zhang

Heifei, China

- Led an ongoing computational protein-design project aiming to generate near-infrared fluorescent proteins with small-molecule binding capability.
- Built an end-to-end workflow on an HPC cluster: constructed binding-site motifs (active-site constraints) → performed constrained structural generation with RFDiffusion3 → optimized sequences with ProteinMPNN → performed scoring-based evaluation and filtering.
- Assessed structural consistency and design credibility using RMSD-based comparisons against design models; obtained a preliminary set of higher-scoring candidate designs.

LEADERSHIP AND ACTIVITIES

National Undergraduate Mathematical Contest

Sep 2024 - Oct 2025

- Awarded the third prize in Anhui Provincial Division.

Teaching Assistant of Analytical Chemistry I for the Sophomore

Sept. 2025 - Present

- Graded weekly homework using a standardized rubric; provided written feedback on common errors.
- Managed course announcements and uploaded problem sets to the course platform.
- Led weekly tutorial or recitation sessions for a sophomore-level Analytical Chemistry I course online; mentored students on problem-solving strategies and exam preparation.

National Undergraduate Training Contest for Innovation

Jul 2025 - Present

- Served as the project leader for the National Undergraduate Innovation and Entrepreneurship Competition.

- Built literature-constrained protein–ligand complex models via RFDiffusion3 scaffold generation and LigandMPNN sequence optimization, with structural quality assessment and filtering in PyMOL.

AWARDS AND HONORS

Outstanding Freshman Scholarship,USTC	Oct 2023
Jiaxi Lu Elite Scholarship (Category A) (Top 2%), USTC	Oct 2024
Outstanding Student Silver Scholarship (Top 10% students in USTC), USTC	Nov 2024
Jiaxi Lu Elite Scholarship (Category A) (Top 2%), USTC	Oct 2025
Jiaxi Lu Scholarship (2024-2025)(Top 5%), USTC	Oct 2025

SKILLS

Languages: English (Toefl : 92), Chinese (Native)
Programming Languages: Python / C / Pymol/ LaTeX / Gaussian / Gromacs
Tools: Pyrosetta / Origin
